HYPNOTISM.

Under the Strange Spell She Carried the Audience by Storm-Famous in a Night.

Doctor John D. Quackenbos, professor in Columbia University, New York, astonished his associates of the Medico- Thereafter, if his health permits, he is Legal Society the other night by telling them how a young actress bounded into fame in a single night under the hypnotic spell. It is the case of a Trilby in real life; not the trick of a chariatan, but a sales, remail accomplishment of latter-day science. The new Trilley is a favorite with theater goers. Her first appearance on the singe was made at a New York theater, when, under the hypnotic spell, she carried the audience by storm; she was called before the curtain again and again at a bound she was famous. The press of the city united in applanding her splendid work. This is only one of the many marvels of this wonderful power. The American College of Sciences of Philadelphia has recently issued a new book by twenty eminent hypnotic specialists, which is being distributed free throughout the country for the purpose of educating and protecting the public. It is one of the most weird and fascinating works ever written. It is richly illustrated with the finest engravings, and its vivid descriptions of the practical uses and possibilities of this marvelous mind-poweh fill one with awe and amazement, Among the many intensely interesting subjects treated are: How to hypnotize instantaneously; how to influence a person secretly without his knowledge; how to develop Personal Magnetism and use it in business, society, etc.; power of the human will; how to cure the most obstinate diseases and bad habits by magnetic forces without drugs or mediclaes; how to make people like you; how to win in business, in society, in love; any one can develop personal magnetism rules which will absolutely develop this power within a short time; the transmission of thought; the development of soul power; how to make a business man listen to you when he would send any 'one else away; how to sell a man goods when he does not want to buy; a legitimate way to double your salary; how to keep people from influ encing you; hundreds secretly influ enced and controlled in body and mind without their knowledge; how to implant a suggestion or command in a subject's mind that he will carry out a week, month or a year hence, just as the hypnotist may wish; how to hypnotize by mail or by telephone; how to de velop within yourself that inward pow er, that force of character, which instantly gives you a control over people without saying a word or making a single gesture. For the benefit of the public we wish to state that if you will rite the American College of Sciences, Dept. 123 J., 420 Walnut street, Philadelphia, Pa., a copy of the above book will be sent to you by mail absolutely free of charge. The college guarantees this offer to be absolutely genuine, with no conditions attached. It is proposed to give away several thousands of copies of the book so that the public may learn the wonderful secrets of this marvelous but much misunderstood science.

All that Alphonso will have to do to become King in fact as well as in name will be to go to the Senaio or Senate and take the oath to support the Constitution, There will be gorgeous robes, state carriages, priestly ancintings, and a company of all the most distinguished of Spains granders, with the Ambassadors and representatives of the other noted royal families of Europe; but crowned heads will be conspicuous by their absence. An American paper recently printed a page full of pictures of most of the Kings and Queens of all Europe, with a title explaining that they were among the folk who would make the English coronation glorious by their presence But not one of them all, except, perhaps, the old King of Denmark, father of Queen Alexandra, will be present at either coronation, because through some queer bit of etiquette, for which no reason except tradition can be killed to the considered good form for one wearer of a crown to see a fellowmonarch crowned.

and Little Figure.

So far as it can be gathered, Alphonso is really popular and behaved in Spain, in spile of the fact that the Republican party sectus to be growing steadily. I am told that as long as the little King lives the monarchy is fairly safe. But after that the deluge, it is an odd fact that the King's heir was his nominal predecessor to the Urone—his cider sister, the Princess of the Asturias. Until he was been she was Queen and if he dies without issue she becomes Queen again, which would make as pretry a row as Spain has seen in the centary, belging by present signs.

The Princess feel in love with Don Carlos of Bourbon, a relative, and adherent of the Pretender to the Spanish throne, a protage of the Pope on one hand and on the other of General Weyler, the most dangerus man in Spain Premier Sagasta, the grand old man of Spain, opposed the matriage bitters of the Prese

On the principle of the old lady who said through the month of May she lived through the rest of the year, it is possible that Alphonso, the unlucky thirteenth, may survive long enough to make his influence felt in Spain, His father, always a Father weakly man, died of consumption at the age of 27, six months before his only son was born. Little Alphonso, who had therefore the rare distinction of being born a King, has had a battle from the first start with the inherited seeds of disease. At 4 he was seized with an illness from which no one expected him to recover, but his experience was another instance of the queer fact that the sickly often can pull through sickness better than the strong.

Reads and Writes English.

Alphonso has been stuffed night and day with the learning that Kings are supposed wit Rends and Writes English. Approximate the only monarch who was born a king and also as the youngest of European monarchs, Queen Wilhelmina coming next in line. He has given promise of a high suirit, strong pariotism, a rather stiff conservatism and considerable haughtiness.

Fond of Outdoor Sports.

To-day he is about as well as he ever has been. You will find scarcely any one in Madrid who does not take it for granted that he is consumptive, but he has not so far given any sign of serious indisposition. After he so narrowly escaped death in Infancy his mother realized that the only hope was to keep him out of doors as much as possible. He has managed somehow to get as firm a grip on manly sports as if he were a robust little English Viscount. They say he is as much at home on a horse as an Arlzona cowboy, and that he would have a fair chance of winning a free-for-all swimming match in which the other boys wouldn't let him come in ahead because he was a King. But his forehead is too high and narrow, his eyes are too bright and his nerves respond too quickly to the stimuli of ordinary experiences.

The rich man who has lost his wealth suffers far more than the poor man who has always been poor, and thus it is that little Alphonso of the unlucky XIII is a more than uncommonly trarie figure.

I attribute this lack of important knowledge to the fact that they have been required to treat a case of fever one day, set a broken limb the next, attend to obstetrical practice the next, etc., until their time and thoughts were so divided that it was impossible for them to keep abreast of the times in any special branch. I repeat what I have so frequently said before, that medicine and surgery cover too much territory for any one man to master. The grass is certain to grow under the feet of any doctor who attempts more than he can do well.

I have made a special study of the treatment of CHRONIC, NERV-OUS AND SEXUAL DISEASES of men for many years, and have been uniformly successful in my practice, to which over ten thousand cured patients will gladly testify. The great secret of my success has been that both rich and poor alike receive my very best services -my whole energy has been concentrated on my Specialties and not scattered over the entire field of medicine and surgery.
